

## *Plant Collectors Needed*

*The SDSU Range Club is seeking assistance in collecting certain range plant species. They are recruiting individuals to collect and press the species needed. The SDSU Range Club will laminate the pressed plants and offer the collections for sale to groups, such as FFA, for educational purposes. The money raised from this project will be used to support their members that participate in the annual SRM Convention.*

---

### *Can you help?*

*If so, please contact Sandy or Luke for information on the species needed.*

**THANKS!**
